

# Thank You - Pneumonia and Alzheimer's Disease Patient Treatment

## A THANK YOU LETTER

I would like to thank from the bottom of my heart Dr. Rachel Alkalay,  
For her support and help in my father's illness  
Yair Abba Rahamim 90 year-old native of Israel lives in Holon who has been diagnosed with  
dementia a decade ago  
Over the years, my father's condition deteriorated  
It started with violent anger attacks and confusion  
Fatigue and exhaustion lack of concentration and unwillingness to eat  
My sisters and I and my mother took him to a specialist professor who specializes in dementia  
My father started taking sedatives and psychogeriatric drugs and he needed treatment 24 hours  
a day by a close therapist  
Over the years a decline began and my father became a long-term care patient who needed a  
24/7 caregiver

A few months ago my father got pneumonia and was hospitalized at Wolfson Hospital  
I talked to Dr. Rachel Alkalay and told her about the situation. She calmed me down and told me  
about her research and work and of course about the new treatment given by drops. That night  
at midnight a special delivery arrived with the treatment.  
At the day we started the treatment, I updated Rachel that my father was released from the  
oxygen balloon and the antibiotics he needed before were stopped  
My father was released home the next day we continued the treatment at home Dad quickly  
changed became stronger became positive started positive to eat and drink and smile to the  
environment started talking a few words what did not happen before and logically answered  
questions  
So Rachel is dear and beloved

Yeshar Choach ( In hebrew) Thanks for everything Keep exploring to develop and evolve  
further - a promising future is awaiting for you  
Huge thanks from the bottom of my heart  
Signed  
Esther Yair, daughter of Yair Rachamim
